Professional Summary

- SOC Analyst with 2 years of experience monitoring security alerts, investigating incidents, and documenting threat activity.
- Skilled in SIEM analysis, log review, endpoint detection, phishing triage, and incident escalation.
- Strong foundation in networking, Linux, security operations, and threat intelligence fundamentals.

Skills

Security operations:

SIEM Monitoring, Incident Triage, Alert Investigation, Threat Intelligence

Tools:

Splunk, Microsoft Sentinel, Wireshark, VirusTotal

Networking:

TCP/IP, DNS, HTTP, Firewalls

Systems:

Windows Security, Linux, Endpoint Logs

Scripting:

Python basics, Bash basics

Work Experience

SOC Analyst at CyberHorizon Defense

Karachi, Pakistan | Apr 2024 - Present

- Monitored SIEM dashboards and investigated suspicious login, malware, and network alerts.
- Created incident tickets with timelines, affected assets, and recommended containment steps.
- Improved phishing triage documentation for faster handoff to senior analysts.

Information Security Intern at SecureLink Systems

Lahore, Pakistan | Jul 2023 - Mar 2024

- Reviewed endpoint logs and assisted with routine vulnerability scan summaries.
- Analyzed suspicious email headers and attachment indicators.
- Supported weekly security awareness reporting and ticket updates.

Projects

SIEM Alert Playbook Library

Tech Stack: Splunk, MITRE ATT&CK, Markdown

Created reusable investigation playbooks for brute force, suspicious PowerShell, and malware alerts.

Phishing IOC Analyzer

Tech Stack: Python, VirusTotal API, CSV, Email Headers

Built a small tool to extract URLs and domains from suspicious emails for reputation checks.

Education

B.S. in Cybersecurity - NED University of Engineering and Technology

Karachi, Pakistan | 2019 - 2023

Certifications

- CompTIA Security+
- Microsoft Security Operations Analyst Associate
