

Amelia Hughes

amelia.hughes@example.com | +61 421 987 654 | Melbourne, Australia

linkedin.com/in/amelia-hughes-ai | github.com/ameliahughes-ai

Professional Summary

- AI Engineer with 4 years of experience developing NLP applications, model evaluation workflows, and AI-powered product features.
- Skilled in Python, Transformers, PyTorch, LangChain-style orchestration, vector search, and API deployment.
- Experienced in building document intelligence systems, search assistants, and production-ready inference services.

Skills

Languages:

Python, SQL

AI and NLP:

Transformers, Text Embeddings, Document Classification, Semantic Search

Machine Learning:

PyTorch, scikit-learn, Model Evaluation

Data Stores:

PostgreSQL, FAISS, Elasticsearch

Deployment:

FastAPI, Docker, AWS

Work Experience

AI Engineer at DocuMind Systems

Melbourne, Australia | Nov 2022 - Present

- Built document classification and semantic search features for enterprise knowledge bases.
- Developed evaluation datasets and metrics for retrieval quality and answer relevance.
- Deployed inference APIs using FastAPI, Docker, and AWS services.

Machine Learning Associate at Southern Analytics Lab

Adelaide, Australia | Jul 2020 - Oct 2022

- Created NLP models for ticket routing, topic labeling, and sentiment trend analysis.
- Prepared text preprocessing pipelines and model evaluation reports.
- Collaborated with engineering teams to integrate model outputs into dashboards.

Projects

Contract Insight Assistant

Tech Stack: Python, Transformers, FAISS, FastAPI

Built a document search assistant for contract clauses with semantic retrieval and metadata filters.

Ticket Topic Classifier

Tech Stack: PyTorch, Hugging Face, pandas, Docker

Created a text classification model to route customer support tickets by issue category.

Education

M.S. in Artificial Intelligence - Monash University

Melbourne, Australia | 2018 - 2020

Certifications

- Natural Language Processing Specialization
- Machine Learning Engineering Certification
