Professional Summary

- Game Programmer with 6 years of experience building gameplay systems, tools, and performance-sensitive features.
- Skilled in Unreal Engine, C++, Blueprints, AI behavior, physics, networking basics, and profiling workflows.
- Experienced in collaborating with designers and artists to deliver interactive mechanics for PC and console prototypes.

Skills

Gameengines:

Unreal Engine, Unity basics

Languages:

C++, C#, Python

Gamesystems:

Gameplay Programming, AI Behavior Trees, Physics, UI

Optimization:

Profiling, Memory Optimization, Frame Rate Analysis

Tools:

Perforce, Git, Blender basics, Unreal Insights

Work Experience

Game Programmer at IronPath Interactive

Tbilisi, Georgia | Jan 2022 - Present

- Implemented gameplay mechanics for action-adventure prototypes using Unreal Engine and C++.
- Built AI behavior trees for enemy patrol, pursuit, and combat decision-making.
- Optimized frame rate by profiling expensive tick functions and reducing unnecessary runtime allocations.

Junior Gameplay Developer at NorthStar Games

Remote | Aug 2018 - Dec 2021

- Created player movement, camera, inventory, and interaction systems in Unity and Unreal prototypes.
- Supported designers with Blueprint scripting and gameplay tuning.
- Fixed gameplay bugs across input, collision, animation triggers, and level transitions.

Projects

Echo Rift Prototype

Tech Stack: Unreal Engine, C++, Blueprints, Behavior Trees

Built a third-person action prototype with enemy AI, interaction systems, and combat abilities.

Dungeon Tools Editor

Tech Stack: Unreal Engine, C++, Editor Utility Widgets

Created internal editor tools for placing rooms, encounters, pickups, and navigation markers.

Education

B.Sc. in Computer Science - Free University of Tbilisi

Tbilisi, Georgia | 2014 - 2018

Certifications

- Unreal Engine C++ Developer Certification
- Game AI Programming Certification
