## Professional Summary

- Machine Learning Engineer with 7 years of experience developing production ML systems and data products.
- Skilled in Python, TensorFlow, PyTorch, feature engineering, MLOps, and cloud-based model deployment.
- Experienced in building recommendation systems, fraud models, and automated training pipelines.

## Skills

### Languages:

Python, SQL, Scala

### Machinelearning:

TensorFlow, PyTorch, scikit-learn, XGBoost

### Mlops:

MLflow, Kubeflow, Docker, Kubernetes

### Cloud:

AWS SageMaker, GCP Vertex AI

### Data:

Spark, Airflow, BigQuery, PostgreSQL

## Work Experience

### Senior Machine Learning Engineer at FinSight AI

Singapore | Oct 2021 - Present

- Built fraud detection models that improved suspicious transaction recall by 23%.
- Created automated model retraining pipelines using Airflow, MLflow, and Kubernetes.
- Partnered with data engineering teams to standardize feature stores for risk analytics.

### Data Scientist at Meridian Retail Analytics

Singapore | Jun 2018 - Sep 2021

- Developed product recommendation models for ecommerce personalization.
- Analyzed customer behavior using SQL, Spark, and Python notebooks.
- Delivered model performance reports for marketing and merchandising teams.

## Projects

### Real-Time Fraud Scoring Service

Tech Stack: Python, XGBoost, FastAPI, Kafka, Docker

Built a low-latency fraud scoring API for transaction risk evaluation.

### Recommendation Pipeline

Tech Stack: PyTorch, Spark, Airflow, MLflow

Created an automated recommendation model workflow with experiment tracking.

## Education

### **M.Sc. in Artificial Intelligence - National University of Singapore**

Singapore | 2016 - 2018

## Certifications

- Google Professional Machine Learning Engineer
- AWS Certified Machine Learning - Specialty
