Professional Summary

- Data Scientist with 6 years of experience building predictive models, analytics pipelines, and business intelligence solutions.
- Skilled in Python, SQL, machine learning, statistical analysis, and dashboarding.
- Experienced in translating business problems into measurable data products.

Skills

Languages:

Python, SQL, R

Machinelearning:

Regression, Classification, Clustering, Time Series

Libraries:

pandas, NumPy, scikit-learn, XGBoost

Visualization:

Tableau, Power BI, Matplotlib, Seaborn

Dataengineering:

ETL, Airflow, PostgreSQL

Work Experience

Senior Data Scientist at Quantiva Analytics

Manchester, UK | Sep 2021 - Present

- Built churn prediction models that improved customer retention campaigns by 18%.
- Automated weekly reporting pipelines using Python and Airflow.
- Partnered with marketing teams to design segmentation models and KPI dashboards.

Data Analyst at FinEdge Group

London, UK | Jun 2018 - Aug 2021

- Developed SQL reports for revenue, risk, and customer behavior analysis.
- Created Tableau dashboards used by finance and operations leadership.
- Improved data quality checks across multiple reporting workflows.

Projects

Customer Churn Predictor

Tech Stack: Python, scikit-learn, XGBoost, PostgreSQL

Created a classification model to identify high-risk customers with explainable outputs.

Sales Forecasting Engine

Tech Stack: Python, Prophet, pandas, Power BI

Built a time-series forecasting workflow for monthly regional sales planning.

Education

M.Sc. in Data Science - University of Manchester

Manchester, UK | 2016 - 2018

Certifications

- Microsoft Certified: Power BI Data Analyst Associate
- IBM Data Science Professional Certificate
