Professional Summary

- Penetration Tester with 5 years of experience assessing web applications, APIs, and internal networks.
- Skilled in OWASP testing, Burp Suite, vulnerability exploitation, secure reporting, and remediation guidance.
- Experienced in working with engineering teams to validate fixes and strengthen application security posture.

Skills

Securitytesting:

Web Penetration Testing, API Security, Network Testing, OWASP Top 10

Tools:

Burp Suite, Nmap, Metasploit, OWASP ZAP, Nikto

Scripting:

Python, Bash, PowerShell basics

Reporting:

Risk Rating, Remediation Guidance, Executive Summaries

Systems:

Linux, Windows, Active Directory basics

Work Experience

Penetration Tester at RedGate Security

Budapest, Hungary | Apr 2021 - Present

- Performed web and API penetration tests for fintech, logistics, and SaaS clients.
- Identified authentication, access control, and input validation vulnerabilities with proof-of-concept evidence.
- Produced remediation-focused reports and verified fixes with development teams.

Security Analyst at Danube CyberWorks

Debrecen, Hungary | Jul 2019 - Mar 2021

- Conducted vulnerability scans and prioritized findings by exploitability and business risk.
- Supported phishing simulations and security awareness reporting.
- Analyzed firewall, endpoint, and authentication logs during incident investigations.

Projects

API Attack Surface Review

Tech Stack: Burp Suite, Postman, OWASP ZAP, JWT

Created a repeatable API testing workflow covering authentication, authorization, rate limits, and schema validation.

Internal Network Lab

Tech Stack: Nmap, Metasploit, Linux, Python

Built a lab environment for practicing service enumeration, exploit validation, and reporting.

Education

B.Sc. in Cybersecurity - Budapest University of Technology and Economics

Budapest, Hungary | 2015 - 2019

Certifications

- Offensive Security Certified Professional
- eLearnSecurity Junior Penetration Tester
