Professional Summary

- Entry-level Data Scientist with strong foundations in statistics, Python, SQL, and machine learning.
- Experienced through internships and academic projects involving customer analytics, forecasting, and dashboards.
- Motivated to build data-driven solutions that improve decision-making and operational efficiency.

Skills

Languages:

Python, SQL, R

Machinelearning:

Regression, Classification, Clustering, Model Evaluation

Libraries:

pandas, NumPy, scikit-learn, Matplotlib, Seaborn

Visualization:

Power BI, Tableau

Datahandling:

Data Cleaning, EDA, Feature Engineering

Work Experience

Data Science Intern at InsightHarbor Analytics

Lagos, Nigeria | Jan 2025 - Dec 2025

- Cleaned and analyzed customer support datasets to identify top ticket drivers.
- Built Power BI dashboards for monthly product usage and retention metrics.
- Created baseline classification models for customer churn analysis.

Research Assistant at Lagos Data Lab

Lagos, Nigeria | Jun 2024 - Nov 2024

- Prepared survey datasets for statistical analysis and visualization.
- Performed exploratory analysis using Python and documented key trends.
- Assisted in presenting findings to academic supervisors and project partners.

Projects

Customer Retention Classifier

Tech Stack: Python, scikit-learn, pandas, Power BI

Built a churn classification project with preprocessing, model comparison, and dashboard output.

Market Basket Insights

Tech Stack: Python, Apriori, SQL, Matplotlib

Analyzed retail transactions to identify product associations and purchasing patterns.

Education

B.Sc. in Statistics - University of Lagos

Lagos, Nigeria | 2020 - 2024

Certifications

- Google Data Analytics Professional Certificate
- Machine Learning with Python Certification
