Professional Summary

- Machine Learning Engineer with 4 years of experience developing predictive models, NLP pipelines, and model APIs.
- Skilled in Python, scikit-learn, PyTorch, FastAPI, feature engineering, model evaluation, and MLOps practices.
- Experienced in converting data science prototypes into reliable services for business applications.

Skills

Languages:

Python, SQL

Machinelearning:

scikit-learn, PyTorch, XGBoost, Model Evaluation

Nlp:

Text Classification, Embeddings, spaCy, Transformers basics

Deployment:

FastAPI, Docker, AWS

Data:

pandas, NumPy, MLflow, PostgreSQL

Work Experience

Machine Learning Engineer at Crescent AI Labs

Islamabad, Pakistan | Feb 2022 - Present

- Built lead scoring and churn prediction models for SaaS customer success workflows.
- Deployed model inference endpoints using FastAPI, Docker, and AWS services.
- Implemented MLflow tracking for experiments, metrics, and model artifacts.

Data Scientist at InsightMatrix Systems

Lahore, Pakistan | Jul 2020 - Jan 2022

- Developed classification models for customer support routing and campaign targeting.
- Prepared feature engineering pipelines using SQL, pandas, and scheduled notebooks.
- Created performance reports using precision, recall, F1-score, and lift metrics.

Projects

Customer Churn API

Tech Stack: Python, XGBoost, FastAPI, Docker

Built a churn scoring service with explainable risk factors and REST-based inference.

Support Ticket Classifier

Tech Stack: PyTorch, spaCy, pandas, MLflow

Created an NLP classifier for routing support tickets by product area and urgency.

Education

B.S. in Artificial Intelligence - National University of Sciences and Technology

Islamabad, Pakistan | 2016 - 2020

Certifications

- Machine Learning Specialization
- MLOps Fundamentals Certification
