Work Experience

Frontend Engineer at UrbanNest Technologies

Ahmedabad, India | Jun 2022 - Present

- Built React dashboards for property listings, lead management, and broker workflows.
- Improved form completion rates by simplifying validation states and error messaging.
- Created reusable UI components documented in Storybook for faster feature delivery.

Associate Frontend Developer at CodeRipple Labs

Surat, India | Aug 2020 - May 2022

- Developed responsive pages using React, JavaScript, and SCSS.
- Integrated REST APIs for search, filters, user preferences, and notifications.
- Fixed accessibility and cross-browser defects during release cycles.

Projects

PropertyPulse Dashboard

Tech Stack: React, TypeScript, Redux Toolkit, Tailwind CSS

Built a real estate dashboard with listing analytics, lead status boards, and saved filters.

FormKit Components

Tech Stack: React, Storybook, Jest, SCSS

Created a reusable form component library with validation states, date pickers, and field groups.
