Professional Summary

- AR/VR Developer with 4 years of experience building immersive training, visualization, and interactive simulation applications.
- Skilled in Unity, C#, AR Foundation, OpenXR, 3D interaction design, and performance optimization for headsets and mobile AR.
- Experienced in collaborating with designers, 3D artists, and product teams to deliver polished XR experiences.

Skills

Xrdevelopment:

Unity, AR Foundation, OpenXR, XR Interaction Toolkit

Languages:

C#, C++ basics, JavaScript

Platforms:

Meta Quest, Android AR, iOS ARKit, Windows

Graphics:

3D Optimization, Lighting, Shader basics

Tools:

Blender, Git, Unity Profiler, Jira

Work Experience

AR/VR Developer at ImmersiLab Studio

Osaka, Japan | Apr 2022 - Present

- Developed VR training simulations with interactive tools, guided steps, and performance scoring.
- Built mobile AR features using AR Foundation for object placement and scene tracking.
- Optimized XR scenes by reducing polygon count, texture sizes, and runtime allocations.

Unity Developer at PixelCraft Japan

Kyoto, Japan | Sep 2020 - Mar 2022

- Created interactive 3D prototypes for product visualization and educational demos.
- Implemented UI panels, controller interactions, and animation triggers in Unity.
- Worked with artists to prepare optimized assets for real-time rendering.

Projects

Factory Safety VR

Tech Stack: Unity, C#, OpenXR, XR Interaction Toolkit

Built a VR safety training simulation with interactive hazards, scoring, and guided tutorials.

FurnitureView AR

Tech Stack: Unity, AR Foundation, ARKit, ARCore

Created a mobile AR app for placing furniture models in real-world spaces with scale controls.

Education

B.A. in Interactive Media Design - Osaka University of Arts

Osaka, Japan | 2016 - 2020

Certifications

- Unity Certified Associate: Programmer
- AR Foundation Development Certification
