Professional Summary

- DevOps Engineer with 6 years of experience managing Kubernetes platforms, CI/CD pipelines, and cloud infrastructure.
- Skilled in Azure, Terraform, Helm, Docker, GitLab CI, observability, and infrastructure automation.
- Experienced in improving release velocity, platform reliability, and developer self-service workflows.

Skills

Cloud:

Azure, AWS basics

Infrastructure:

Terraform, Ansible, Linux

Containers:

Kubernetes, Docker, Helm

Cicd:

GitLab CI, Jenkins, Argo CD

Monitoring:

Prometheus, Grafana, ELK Stack

Work Experience

DevOps Engineer at AtlasGrid Cloud

Prague, Czech Republic | Feb 2021 - Present

- Managed Kubernetes environments for microservices deployed across staging and production.
- Built Terraform modules for Azure networking, managed databases, and container registries.
- Implemented GitOps deployments using Argo CD and Helm charts.

Build and Release Engineer at Vltava Software

Brno, Czech Republic | May 2018 - Jan 2021

- Maintained CI pipelines for Java and Node.js services using Jenkins and GitLab CI.
- Automated release packaging, versioning, and deployment verification steps.
- Created monitoring dashboards for build failures and deployment health.

Projects

Azure Kubernetes Platform

Tech Stack: Azure AKS, Terraform, Helm, Argo CD

Built a Kubernetes platform with repeatable infrastructure provisioning and GitOps delivery.

Pipeline Observability Suite

Tech Stack: GitLab CI, Prometheus, Grafana, ELK Stack

Created dashboards and alerts for deployment duration, failure causes, and release frequency.

Education

B.Sc. in Software Engineering - Czech Technical University in Prague

Prague, Czech Republic | 2014 - 2018

Certifications

- Microsoft Certified: Azure Administrator Associate
- Certified Kubernetes Administrator
