Professional Summary

- Blockchain Developer with 4 years of experience building smart contracts, decentralized applications, and Web3 integrations.
- Skilled in Solidity, Ethereum, Hardhat, TypeScript, smart contract testing, and wallet connectivity.
- Experienced in writing secure contract logic, gas optimization, and collaborating with frontend teams.

Skills

Blockchain:

Solidity, Ethereum, Smart Contracts, ERC-20, ERC-721

Web3:

ethers.js, wagmi, MetaMask Integration

Frontend:

React, TypeScript, Next.js

Testing:

Hardhat, Foundry, Chai

Security:

Reentrancy Prevention, Access Control, Gas Optimization

Work Experience

Blockchain Developer at ChainHarbor Labs

Tel Aviv, Israel | Apr 2022 - Present

- Developed and tested Solidity contracts for token staking and NFT membership products.
- Reduced gas usage in reward distribution contracts through storage layout improvements.
- Built Web3 integrations connecting smart contracts with React-based user interfaces.

Software Developer at OpenGrid Apps

Jerusalem, Israel | Sep 2020 - Mar 2022

- Built TypeScript features for SaaS dashboards and account management pages.
- Integrated third-party APIs for payments, analytics, and notifications.
- Participated in smart contract prototyping for internal Web3 experiments.

Projects

StakeVault Protocol

Tech Stack: Solidity, Hardhat, ethers.js, TypeScript

Built a staking contract system with reward accounting, lock periods, and test coverage.

CollectiveMint DApp

Tech Stack: Next.js, Solidity, wagmi, IPFS

Created an NFT minting application with wallet connection, metadata storage, and contract reads.

Education

B.Sc. in Computer Science - Tel Aviv University

Tel Aviv, Israel | 2016 - 2020

Certifications

- Certified Blockchain Developer
- Smart Contract Security Fundamentals
