Professional Summary

- Computer Vision Engineer with 4 years of experience developing image analysis and visual inspection systems.
- Skilled in Python, OpenCV, PyTorch, TensorFlow, object detection, segmentation, and model deployment.
- Experienced in manufacturing quality inspection, dataset preparation, and model performance optimization.

Skills

Languages:

Python, C++, SQL

Computervision:

Object Detection, Image Segmentation, OpenCV, YOLO

Deeplearning:

PyTorch, TensorFlow, CNNs, Transfer Learning

Deployment:

Docker, FastAPI, ONNX

Data:

Label Studio, pandas, NumPy, Data Augmentation

Work Experience

Computer Vision Engineer at OptiSense Robotics

Munich, Germany | Mar 2022 - Present

- Built defect detection models for production line imagery using PyTorch and OpenCV.
- Improved model precision by curating labeled datasets and applying targeted augmentation.
- Deployed image inference APIs using Docker and FastAPI for internal inspection tools.

Machine Learning Developer at VisionMetric Labs

Stuttgart, Germany | Sep 2020 - Feb 2022

- Developed object detection prototypes for vehicle part recognition.
- Created evaluation scripts for precision, recall, IoU, and class-level error analysis.
- Supported annotation workflow improvements for computer vision datasets.

Projects

Surface Defect Detector

Tech Stack: Python, PyTorch, OpenCV, FastAPI

Built a defect classification and localization system for industrial surface images.

Warehouse Object Counter

Tech Stack: YOLO, OpenCV, Docker, ONNX

Created an object detection pipeline for counting inventory items from camera feeds.

Education

M.Sc. in Robotics and AI - Technical University of Munich

Munich, Germany | 2018 - 2020

Certifications

- Deep Learning Specialization
- Computer Vision with PyTorch Certification
