Android Studio, Firebase, Gradle, Git

Work Experience

Android Developer at IberiaPay Digital

Madrid, Spain | Aug 2021 - Present

- Built secure Kotlin features for account overview, transaction search, and card controls.
- Improved offline reliability by implementing Room caching and repository-based data flows.
- Reduced crash reports by fixing lifecycle issues and improving error handling around API failures.

Mobile Application Developer at SolApps Studio

Valencia, Spain | Jul 2019 - Jul 2021

- Developed onboarding, profile, and notification modules for Android consumer apps.
- Integrated Firebase Analytics, Crashlytics, and push notification workflows.
- Supported release testing across multiple Android device profiles.

Projects

CardGuard Android

Tech Stack: Kotlin, Jetpack Compose, Room, Retrofit

Built a banking app prototype with card controls, transaction search, and offline summaries.

TaskBeacon Mobile

Tech Stack: Kotlin, Coroutines, WorkManager, Firebase

Created a productivity app with recurring tasks, reminders, and cloud-backed notifications.

Education

B.Sc. in Computer Engineering - Universidad Politecnica de Madrid

Madrid, Spain | 2015 - 2019

Certifications

- Associate Android Developer
- Kotlin Advanced Mobile Development Certification
