Professional Summary

- Backend Engineer with 7 years of experience building scalable APIs, data services, and integration platforms.
- Skilled in Python, Django, FastAPI, PostgreSQL, Redis, asynchronous processing, and cloud deployment.
- Experienced in improving system performance, designing clean service boundaries, and mentoring backend teams.

Skills

Backend:

Python, Django, FastAPI, REST APIs, GraphQL

Databases:

PostgreSQL, Redis, MongoDB

Messaging:

Celery, RabbitMQ, Kafka basics

Cloudanddevops:

AWS, Docker, GitHub Actions

Practices:

API Design, Test-Driven Development, Code Reviews, Agile

Work Experience

Senior Backend Engineer at CedarFlow Systems

Portland, USA | Jan 2021 - Present

- Designed FastAPI services for order routing, inventory sync, and customer notifications.
- Reduced background job failures by improving Celery retry policies and task observability.
- Mentored junior engineers on API contracts, database migrations, and production debugging.

Backend Developer at Cascade Web Services

Seattle, USA | Jun 2018 - Dec 2020

- Built Django applications for client onboarding, document workflows, and reporting dashboards.
- Optimized PostgreSQL queries and reduced report generation time by 36%.
- Created automated test suites for payment and account management services.

Projects

Inventory Sync Hub

Tech Stack: FastAPI, PostgreSQL, Redis, Celery

Developed a backend service for synchronizing inventory changes across warehouse and storefront systems.

Document Review API

Tech Stack: Django, GraphQL, AWS S3, Docker

Built an API for secure document upload, reviewer assignments, and status tracking.

Education

B.S. in Computer Science - Oregon State University

Corvallis, USA | 2014 - 2018

Certifications

- Python Backend Development Certification
- AWS Certified Developer - Associate
