Professional Summary

- Cloud Engineer with 6 years of experience designing AWS and Kubernetes infrastructure for SaaS platforms.
- Skilled in Terraform, Docker, EKS, GitHub Actions, observability, and infrastructure cost optimization.
- Experienced in building secure, repeatable environments and improving deployment reliability.

Skills

Cloud:

AWS, Azure basics

Infrastructure:

Terraform, CloudFormation, Linux

Containers:

Docker, Kubernetes, Amazon EKS, Helm

Cicd:

GitHub Actions, GitLab CI, Jenkins

Monitoring:

CloudWatch, Prometheus, Grafana, Datadog

Work Experience

Cloud Engineer at NordStack Platforms

Copenhagen, Denmark | May 2021 - Present

- Built Terraform modules for EKS clusters, VPC networking, IAM roles, and RDS databases.
- Reduced monthly cloud spend by identifying unused resources and right-sizing workloads.
- Improved deployment reliability by adding environment checks and rollback procedures.

DevOps Specialist at BalticOps Digital

Aarhus, Denmark | Jul 2018 - Apr 2021

- Maintained CI/CD pipelines for backend services and scheduled jobs.
- Containerized legacy services using Docker and deployed them to Kubernetes.
- Created monitoring dashboards for API latency, error rates, and resource usage.

Projects

EKS Platform Blueprint

Tech Stack: Terraform, Amazon EKS, Helm, CloudWatch

Built an AWS Kubernetes platform blueprint with networking, IAM, logging, and deployment templates.

Cloud Cost Analyzer

Tech Stack: Python, AWS Cost Explorer, S3, Grafana

Created a reporting workflow to track service-level AWS spend and optimization opportunities.

Education

B.Sc. in Computer Science - Technical University of Denmark

Copenhagen, Denmark | 2014 - 2018

Certifications

- AWS Certified Solutions Architect - Associate
- HashiCorp Terraform Associate
