Professional Summary

- Data Scientist with 2 years of experience applying analytics and machine learning to product and customer datasets.
- Skilled in Python, SQL, statistics, experimentation, dashboards, and supervised learning workflows.
- Experienced in creating clear insights, model reports, and practical recommendations for product teams.

Skills

Languages:

Python, SQL, R basics

Machinelearning:

Regression, Classification, Clustering, Model Evaluation

Analytics:

A/B Testing, Exploratory Data Analysis, KPI Reporting

Libraries:

pandas, NumPy, scikit-learn, Matplotlib, Seaborn

Visualization:

Tableau, Looker Studio, Power BI basics

Work Experience

Data Scientist at ProductLens Analytics

San Francisco, USA | Aug 2024 - Present

- Analyzed product usage funnels and identified drop-off points across onboarding flows.
- Built classification models to predict trial conversion likelihood for growth campaigns.
- Created Tableau dashboards for activation, retention, and feature adoption metrics.

Data Analyst at BayMetrics Studio

Oakland, USA | Jul 2023 - Jul 2024

- Prepared SQL datasets for recurring customer behavior and revenue reports.
- Supported A/B test analysis with statistical summaries and confidence intervals.
- Automated weekly reporting workflows using Python scripts.

Projects

Trial Conversion Predictor

Tech Stack: Python, scikit-learn, SQL, Tableau

Created a conversion prediction model using product events, account metadata, and usage frequency.

Feature Adoption Dashboard

Tech Stack: SQL, Tableau, pandas, Looker Studio

Built dashboards tracking adoption, engagement, retention, and cohort behavior by feature.

Education

B.S. in Data Science - University of California, Berkeley

Berkeley, USA | 2019 - 2023

Certifications

- Google Advanced Data Analytics Certificate
- Applied Machine Learning with Python Certification
