Professional Summary

- NLP Engineer with 5 years of experience building language models, search systems, and text analytics workflows.
- Skilled in Python, Transformers, PyTorch, vector search, information retrieval, and production API deployment.
- Experienced in improving document understanding, semantic search, and knowledge extraction systems.

Skills

Languages:

Python, SQL

Nlp:

Transformers, Text Classification, Named Entity Recognition, Semantic Search

Machinelearning:

PyTorch, scikit-learn, Model Evaluation

Search:

Elasticsearch, FAISS, Vector Embeddings

Deployment:

FastAPI, Docker, AWS

Work Experience

NLP Engineer at LexiCore AI

Seattle, USA | Nov 2021 - Present

- Built semantic search pipelines for legal and policy document retrieval.
- Improved entity extraction accuracy by fine-tuning transformer-based models on domain datasets.
- Deployed NLP inference services using FastAPI, Docker, and AWS infrastructure.

Machine Learning Developer at NorthStar DataWorks

Portland, USA | Jul 2019 - Oct 2021

- Developed text classification models for support ticket routing and sentiment analysis.
- Created model evaluation dashboards to compare precision, recall, and confidence thresholds.
- Collaborated with data engineers to improve labeled dataset quality.

Projects

PolicySearch Engine

Tech Stack: Python, Transformers, FAISS, FastAPI

Created a semantic search service for policy documents with query embeddings and ranked results.

Support Intent Classifier

Tech Stack: PyTorch, Hugging Face, pandas, Docker

Built an intent classification model for routing customer support messages to specialized teams.

Education

M.S. in Computer Science - University of Washington

Seattle, USA | 2017 - 2019

Certifications

- DeepLearning.AI Natural Language Processing Specialization
- AWS Machine Learning Foundations
