Professional Summary

- Application Security Analyst with 4 years of experience supporting secure SDLC practices for web and cloud applications.
- Skilled in vulnerability assessment, secure code review, OWASP Top 10 testing, SAST, DAST, and developer guidance.
- Experienced in coordinating remediation, documenting risk, and improving security awareness within engineering teams.

Skills

Applicationsecurity:

Secure SDLC, OWASP Top 10, Threat Modeling, Secure Code Review

Testing:

SAST, DAST, API Security Testing, Dependency Scanning

Tools:

Burp Suite, OWASP ZAP, Snyk, Semgrep

Cloudsecurity:

AWS IAM, Secrets Management, Container Security basics

Scripting:

Python, Bash, JavaScript basics

Work Experience

Application Security Analyst at PacificShield Security

Auckland, New Zealand | Jan 2023 - Present

- Reviewed web application releases for authentication, authorization, and input validation risks.
- Integrated dependency and static analysis scans into CI workflows for engineering teams.
- Created remediation guidance mapped to OWASP Top 10 and internal security standards.

Security Analyst at HarborSec Consulting

Wellington, New Zealand | Jul 2020 - Dec 2022

- Performed vulnerability assessments for web applications and cloud-hosted services.
- Prepared risk reports with severity ratings, evidence, and remediation recommendations.
- Supported phishing reviews and security awareness sessions for client teams.

Projects

Secure Pull Request Checks

Tech Stack: Semgrep, Snyk, GitHub Actions, Docker

Implemented automated code and dependency scans with severity-based reporting for pull requests.

OWASP API Review Guide

Tech Stack: Burp Suite, Postman, OWASP ZAP, Markdown

Created a structured API security testing guide covering authentication, authorization, and input handling.

Education

B.Sc. in Cybersecurity - University of Auckland

Auckland, New Zealand | 2016 - 2020

Certifications

- CompTIA Security+
- Certified Secure Software Lifecycle Professional
