Professional Summary

- Blockchain Engineer with 5 years of experience building smart contracts, decentralized applications, and tokenized workflows.
- Skilled in Solidity, Hardhat, Foundry, TypeScript, ethers.js, smart contract testing, and Web3 frontend integration.
- Experienced in secure contract design, gas optimization, and collaborating with auditors and frontend teams.

Skills

Blockchain:

Solidity, Ethereum, Smart Contracts, ERC-20, ERC-721

Web3:

ethers.js, wagmi, WalletConnect, MetaMask

Frontend:

React, Next.js, TypeScript

Testing:

Hardhat, Foundry, Chai

Security:

Access Control, Reentrancy Protection, Gas Optimization

Work Experience

Blockchain Engineer at CedarsChain Labs

Beirut, Lebanon | Jun 2021 - Present

- Developed Solidity contracts for token vesting, staking, and membership NFT products.
- Improved contract test coverage using Hardhat and Foundry-based unit tests.
- Reduced gas costs in reward claim logic through storage and loop optimization.

Full Stack Developer at Levant Digital Works

Remote | Jul 2019 - May 2021

- Built React and Node.js features for dashboard and account management applications.
- Integrated wallet-based authentication prototypes for internal Web3 experiments.
- Created API integrations for payments, analytics, and notifications.

Projects

VestingVault Contracts

Tech Stack: Solidity, Foundry, Hardhat, TypeScript

Built token vesting contracts with cliff schedules, beneficiary management, and automated tests.

MemberPass DApp

Tech Stack: Next.js, Solidity, wagmi, IPFS

Created an NFT membership app with wallet connection, metadata storage, and contract interactions.

Education

B.S. in Computer Science - American University of Beirut

Beirut, Lebanon | 2015 - 2019

Certifications

- Certified Blockchain Developer
- Smart Contract Security Certification
