Professional Summary

- Site Reliability Engineer with 8 years of experience operating cloud-native platforms and improving production reliability.
- Skilled in Kubernetes, AWS, Terraform, observability, incident response, and service-level objectives.
- Experienced in reducing toil, improving incident processes, and building scalable infrastructure for engineering teams.

Skills

Cloud:

AWS, GCP, Azure basics

Reliability:

SLOs, Incident Response, Error Budgets, Capacity Planning

Containers:

Kubernetes, Docker, Helm

Infrastructure:

Terraform, Pulumi, Linux

Observability:

Prometheus, Grafana, Datadog, OpenTelemetry

Work Experience

Site Reliability Engineer at NordCloud Retail

Stockholm, Sweden | May 2020 - Present

- Managed reliability practices for Kubernetes-hosted commerce services.
- Introduced SLO dashboards and incident review processes for customer-facing APIs.
- Reduced operational toil by automating common recovery and scaling tasks.

Platform Engineer at ArcticSoft Systems

Gothenburg, Sweden | Sep 2017 - Apr 2020

- Built shared CI/CD templates for containerized services and backend jobs.
- Provisioned AWS infrastructure using Terraform and reusable modules.
- Improved monitoring coverage for latency, saturation, and error rates.

Linux Systems Engineer at Baltic Hosting Group

Malmo, Sweden | Jun 2016 - Aug 2017

- Maintained Linux servers, patching, backups, and uptime monitoring.
- Automated operational scripts for user provisioning and service restarts.
- Supported on-call troubleshooting for hosted customer applications.

Projects

SLO Monitoring Platform

Tech Stack: Prometheus, Grafana, OpenTelemetry, Kubernetes

Built service reliability dashboards tracking latency, errors, saturation, and availability objectives.

Automated Incident Toolkit

Tech Stack: Python, AWS Lambda, Slack API, Datadog

Created automated incident helpers for alert context, runbook links, and escalation routing.

Education

B.Sc. in Computer Engineering - KTH Royal Institute of Technology

Stockholm, Sweden | 2012 - 2016

Certifications

- AWS Certified DevOps Engineer - Professional
- Certified Kubernetes Administrator
