Professional Summary

- Machine Learning Engineer with 3 years of experience developing recommendation, classification, and data processing systems.
- Skilled in Python, PyTorch, scikit-learn, feature engineering, model evaluation, and API deployment.
- Experienced in transforming research notebooks into reliable model services for product teams.

Skills

Languages:

Python, SQL

Machinelearning:

PyTorch, scikit-learn, XGBoost, Recommendation Systems

Data:

pandas, NumPy, Feature Engineering, Data Validation

Deployment:

FastAPI, Docker, AWS Lambda

Mlops:

MLflow, Model Monitoring basics, GitHub Actions

Work Experience

Machine Learning Engineer at Recommenda Labs

Dublin, Ireland | Jun 2023 - Present

- Developed product recommendation models that improved click-through rates in pilot campaigns.
- Deployed model inference APIs using FastAPI and Docker for internal product experiments.
- Tracked experiments and model artifacts using MLflow.

Junior Data Scientist at Celtic Insights

Cork, Ireland | Aug 2021 - May 2023

- Built classification models for customer segmentation and campaign targeting.
- Prepared cleaned datasets and feature tables using Python and SQL.
- Created model evaluation reports with precision, recall, F1-score, and business impact notes.

Projects

Personalized Product Recommender

Tech Stack: Python, PyTorch, pandas, FastAPI

Built a recommendation model service using user-item interactions and product metadata.

Lead Quality Classifier

Tech Stack: scikit-learn, XGBoost, SQL, MLflow

Created a lead scoring workflow with experiment tracking and threshold-based reporting.

Education

M.Sc. in Data Analytics - University College Dublin

Dublin, Ireland | 2019 - 2021

Certifications

- Machine Learning Engineering for Production Specialization
- PyTorch Deep Learning Certification
