Work Experience

Full Stack Developer at TaskHarbor Software

Leeds, UK | Feb 2022 - Present

- Developed workflow automation features for approvals, comments, and audit trails.
- Built secure API endpoints with role-based permissions and input validation.
- Reduced dashboard load times by optimizing database queries and server-side rendering.

Software Engineer at BrightLane Digital

Manchester, UK | Jul 2019 - Jan 2022

- Created customer portals using React, Node.js, and PostgreSQL.
- Integrated payment, email, and reporting APIs for client projects.
- Implemented automated tests and deployment workflows using GitHub Actions.

Projects

ApprovalFlow SaaS

Tech Stack: Next.js, Node.js, Prisma, PostgreSQL

Built a workflow approval platform with comments, document links, and audit history.

Client Metrics Portal

Tech Stack: React, GraphQL, Redis, Docker

Created a reporting portal with cached metrics, custom date ranges, and exportable summaries.

Education

B.Sc. in Software Engineering - University of Leeds

Leeds, UK | 2015 - 2019

Certifications

- AWS Certified Cloud Practitioner
- GraphQL API Development Certification
