Professional Summary

- Data Engineer with 5 years of experience building data pipelines, warehouse models, and analytics platforms.
- Skilled in Python, SQL, Spark, Airflow, dbt, cloud storage, and data quality automation.
- Experienced in enabling analytics teams with reliable, documented, and scalable data products.

Skills

Languages:

Python, SQL, Scala basics

Dataengineering:

ETL, ELT, Data Modeling, Data Quality

Platforms:

Apache Spark, Airflow, dbt, Kafka

Databases:

PostgreSQL, Snowflake, BigQuery

Cloud:

AWS S3, GCP Cloud Storage, Docker

Work Experience

Data Engineer at Bosphorus Analytics

Istanbul, Turkey | Jun 2021 - Present

- Built Airflow pipelines that processed daily sales, inventory, and customer datasets.
- Designed dbt models for finance and marketing analytics with documented lineage.
- Improved data quality by implementing automated validation checks and alerting.

BI Developer at AnkaRetail Systems

Ankara, Turkey | Jul 2019 - May 2021

- Developed SQL transformations for sales dashboards and operations reporting.
- Created scheduled data exports for business units and partner integrations.
- Optimized warehouse queries to reduce reporting latency.

Projects

Retail Data Lake Pipeline

Tech Stack: Python, Airflow, AWS S3, Spark

Built a batch pipeline for ingesting, transforming, and validating daily retail datasets.

Finance Analytics Warehouse

Tech Stack: dbt, Snowflake, SQL, GitHub Actions

Created modeled finance tables with tests, documentation, and automated deployment checks.

Education

B.Sc. in Computer Engineering - Istanbul Technical University

Istanbul, Turkey | 2015 - 2019

Certifications

- Databricks Lakehouse Fundamentals
- dbt Analytics Engineering Certification
